

BTAP Income Verification

Business Training and Assistance Program (BTAP) providers with the City of Philadelphia serve low to moderate income individuals with technical assistance, advice, and business support services to start and/or grow a micro-enterprise. A micro-enterprise is a commercial enterprise that has five (5) or fewer employees, one of whom can be the business owner.

All BTAP providers must document and determine eligibility of participation through an income verification. Please assist us in serving you and the broader community by filling out the information below.
